

Better Life Index

Presentation

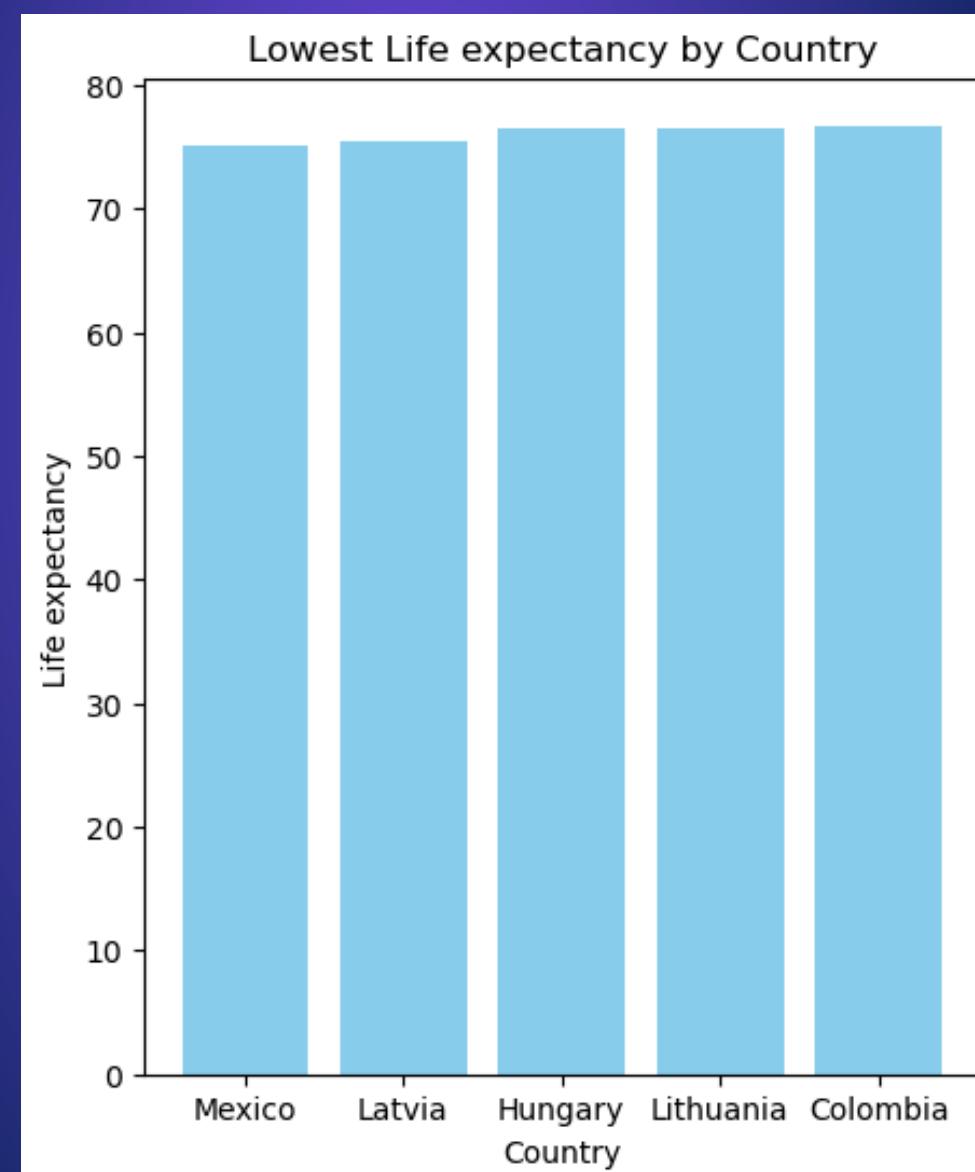

An analysis of the factors contributing to the highest life expectancy in various countries.

Highest & Lowest L.E

Here are the top 5 countries with the highest and lowest life expectancies.

Contributing Environmental & Social Factors to L.E

Environmental Factors

Country	Water quality	Life expectancy
Norway	98	83.0
Iceland	97	83.2
Sweden	97	83.2
Finland	97	82.1
Switzerland	96	84.0

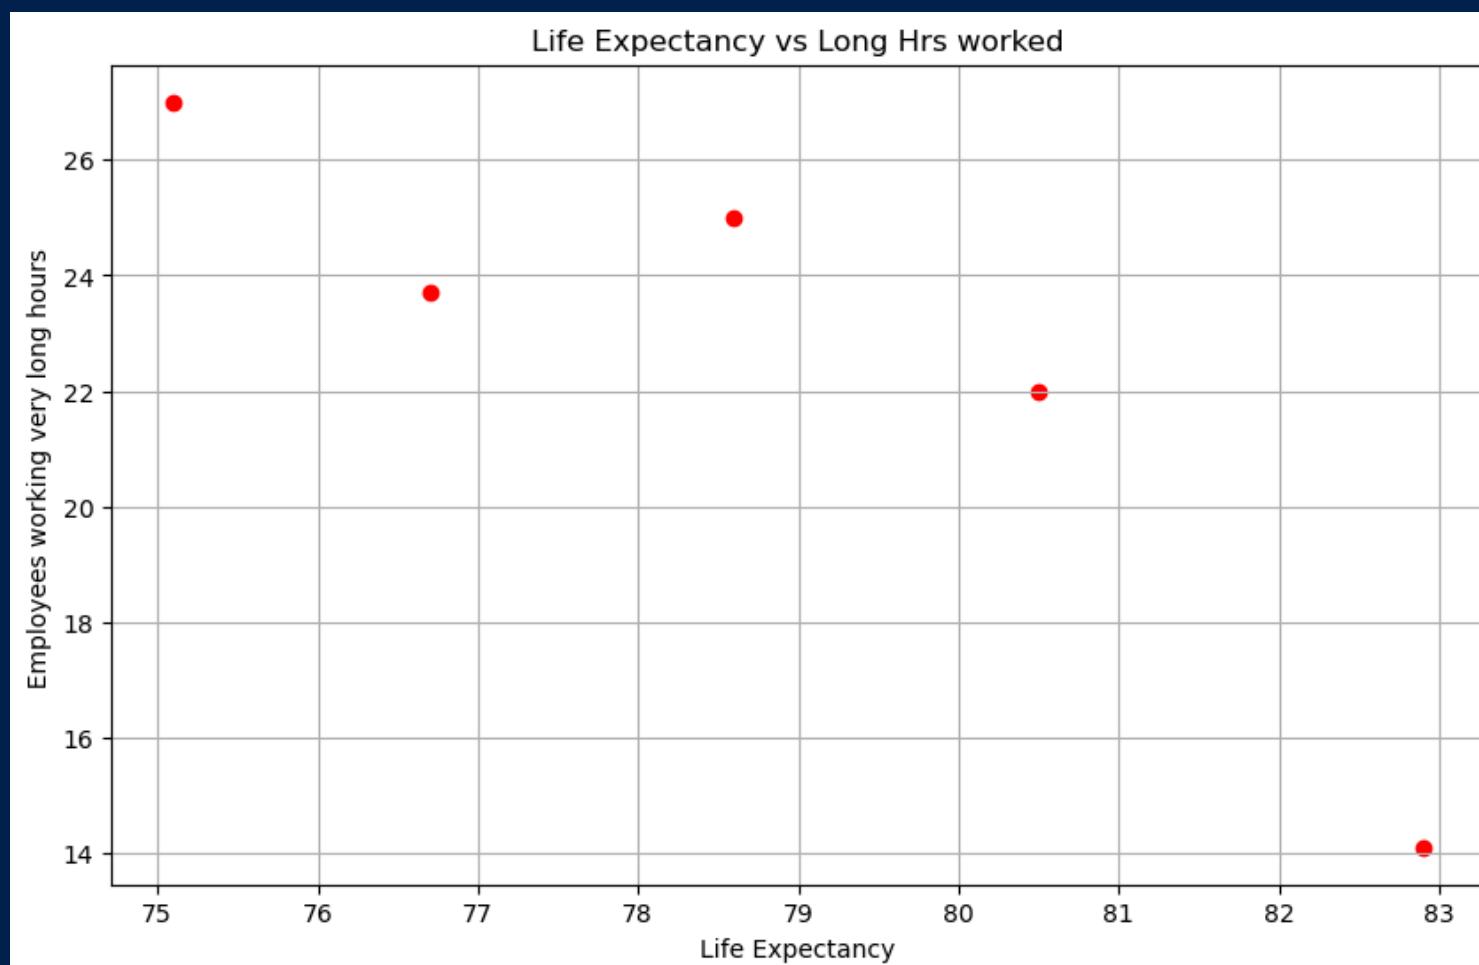

Country	Air pollution	Life expectancy
Korea	27.3	83.3
Türkiye	27.1	78.6
Chile	23.4	80.6
Poland	22.8	78.0
Colombia	22.6	76.7

Social Factors

Country	Educational attainment	Life expectancy
Czechia	94.0	79.3
Lithuania	94.0	76.4
Poland	93.0	78.0
United States	92.0	78.9
Canada	92.0	82.1

Country	Time devoted to leisure and personal care	Life expectancy
Italy	16.47	83.6
France	16.2	82.9
Spain	15.75	82.9
Norway	15.67	83.0
Germany	15.62	81.4

Main Contributors to L.E

In Conclusion

Factors influencing life expectancy across countries:

- Longer working hours linked to lower life expectancy.
- No clear correlations with social or environmental factors.
- High life expectancy not always tied to educational attainment.
- Countries like Italy and Spain prioritize leisure and personal care.

Study highlights work-life balance's impact on life expectancy, suggesting promoting well-being alongside education is crucial for improvement.
